13-SEP-2005 (TrEMBLrel. 31, Last sequence update)
13-SEP-2005 (TrEMBLrel. 31, Last annotation update)
Chromosome undetermined SCAF2190, whole genome shotgun sequence.
          NUCLEOTIDE SEQUENCE.
Genoscope; Whitehead Institute Centre for Genome Research;
Submitted (PEB-2004) to the EMBL/GenBank/DDBJ databases.
-!- CAUTION: The sequence shown here is derived from an EMBL/GenBank/DDBJ whole genome shotgun (WGS) entry which is preliminary data.

"Annotation of the draft genome assembly of Arthrobacter sp. FB24.";
Submitted (JUN-2005) to the EMBL/GenBank/DDBJ databases.
---- CAUTION: The sequence shown here is derived from an
EMBL/GenBank/DDBJ whole genome shotgun (WGS) entry which is
preliminary data.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
                                                                                                                                                                                                                                                                                                                                                        01-DEC-2001 (TrEMBLrel. 19, Created)

NUMBER OF SEQUENCES: 11AANSMIDSION
STREET: 1155 Avenue of the Americas
CITY: New York
STATE: New York
COMPUTER: New York
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC COMPATIBLE
COMPUTER: IBM PC COMPATIBLE
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PATENTIN Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/255,208A
FILING DATE: 07-UN-1994
CLASSIFICATION: 435
ATTORNEY/AGENT INFORMATION:
NAMME: COPILEX, 104
REGISTRATION NUMBER: 30,742
REFERENCE/DOCKET NUMBER: 7872-010
TELECOMMUNICATION NUMBER: 7872-010
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOCTWARE: Patentin Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/474,349A
FILING DATE: 07-JUN-1995
CLASSIFICATION:
ATTORNEY/AGENT INFORMATION:
NAME: COTUZZI, LBULA A.
REGISTRATION NUMBER: 30,742
REFERENCE/DOCKET NUMBER: 7872-024
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTION NUMBER: 30,742
TELEPANTICATION INFORMATION:
TELEPANTION FOR SEQ ID NO: 84:
SEQUENCE CHARACTERISTICS:
LENGTH: 28 amino acids
TYPE: amino acids
STRANBEDNESS:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                           Sequence 1549, Application US/09350841A

Sequence 1549, Application US/09350841A

Patent No. 6750008

GENERAL INFORMATION:

APPLICANT JOHES, Peter;

APPLICANT JOHES, Peter;

TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR INHIBITION OF MEMBRANE

TITLE OF INVENTION: MISSION-ASSOCIATED EVENTS, INCLUDING HIV TRANSMISSION

FILE REFERENCE: 7872-066-999

CURRENT APPLICATION NUMBER: US/09/350,841A

CURRENT PILING DATE: 1999-07-09

NUMBER OF SEQ ID NOS: 1946

SOFTWARE: PATENTIN Ver. 2.1

ENEGTH: 28

LENGTH: 28

Patent NO. 6750008

GENERAL INFORMATION:
APPLICANT: Defer,
TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR INHIBITION OF MEMBRANE
TITLE OF INVENTION: FUSION-ASSOCIATED EVENTS, INCLUDING HIV TRANSMISSION
FILLS REPRENCE: 7872-066-999
CURRENT APPLICATION NUMBER: US/09/350,841A
CURRENT FILING DATE: 1999-07-09
NUMBER OF SEQ ID NOS: 1946
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
